

## **Outstanding management can avoid and pass through sudden natural disasters - July 3, 2018**

From the evening of July 1, 2018 to the noon of the July 2, 2018, there was a heavy rainstorm in Chengdu. The bad weather caused the roads and houses to be damaged in Sichuan, the subway was shut down, and the power supply system was faulty.

Yesterday, Everbright Grand China Assets Limited. (“EBGCA”), the Chengdu Everbright Finance Center and Chengdu Everbright International Mansion were suffered from sudden power outages due to extreme weather. The duty officer started the contingency measures to respond to emergencies with high-quality management capabilities and quickly started. Emergency plan for power outage, open the emergency power supply of the building to restore electricity to elevators and public areas, and ensure the safety of customers. At the same time, close contact with customers to make relief work, hope no one is damaged.

With the support of the Government Affairs Service Center of Chengdu Municipal People’s Government, EBGCA has assisted the engineering staff dispatched by the Power Supply Bureau to repair and inspect the building's power system. In cooperation with the parties, the power supply was restored on the same day, minimizing the impact on customers.

EBGCA always focuses on safety first, attaches great importance to flood control safety inspection, and employees pay attention on their duty. They work together with Government Affairs Service Center of Chengdu Municipal People’s Government and to eliminate difficulties and make the building safe and secure. All facilities are currently operating normally, and property is safe.

The picture shows the company and the power supply bureau engineers carefully to repair the power supply system.

No water was found in the parking facilities of the building, and the vehicles were unimpeded.
